Professional Summary

Innovative **Frontend Developer** with a strong background in building high-performance, scalable, and accessible web applications using **React, Vue, Angular, and TypeScript**. Skilled in creating Progressive Web Apps (PWAs), optimizing performance, and integrating APIs to deliver intuitive, device-responsive user experiences. Adept at collaborating across teams, translating design systems into maintainable architectures, and improving app performance and user engagement through clean, reusable code.

Core Skills

- **Frontend:** Vue.js, React, Redux-Toolkit, Vuex, Pinia, Tailwind CSS, HTML5, SCSS, Vite, Axios
- **Backend:** Node.js, Express.js, REST APIs, Firebase
- **DevOps & Tools:** Git, GitHub Actions, Postman, AWS (EC2, S3, Lambda), CI/CD
- **Other:** Agile/Scrum, API Documentation, Remote Collaboration.

Professional Experience

Front-End Developer ([Vue.js](#)) | Rally Trade – Hybrid

March 2021 – Present

- Created UI dashboards and reusable Vue components to visualize data in real time.
- Worked closely with backend developers to consume REST APIs and manage application state.
- Participated in design sprints, user feedback loops, and performance audits to optimize UX.
- Utilizes Vue and REST API to build astonishing user friendly Client Office Application that raises user satisfaction to 45%

Full Stack JavaScript Developer | Deboik International – Remote

May 2022 – Present

- Currently working on an **on-demand Laravel + Vue.js platform** for household repairs and fixes.
- Developed scalable REST APIs using **Express.js** and **MongoDB** for mobile and web applications.
- Built responsive, modular front-end interfaces in **Vue.js** using **Vue Router** and **Pinia**.
- Implemented **user authentication**, **payment integrations** (Paystack & Flutterwave), and **role-based access control**.
- Integrated cloud services including **AWS S3**, **Lambda**, and **CloudWatch** for file storage and event monitoring.
- Deployed containerized applications using **Docker**, and managed pipelines via **CI/CD** workflows.
- Collaborated with UI/UX, mobile, and QA teams in an **Agile remote team environment** to ship production-ready features.

Certifications

JavaScript Pure Function (Microverse)

React & Redux Module (Microverse)

Portfolio
